

**GREATER  
MANCHESTER**  
DOING DIGITAL DIFFERENTLY

# Your child's developmental assessments – now online!

We've launched a new online app that will help to check that your child is developing as expected and to provide support quicker when needed.

The app includes the developmental assessments that Health Visitors undertake with parents and carers of children aged 0 - 2.5 years old.

or speak to your health visitor.

# Giving your child the best start in life

We've launched a new online app that will help to check that your child is developing as expected and to provide support quicker when needed.

The app includes the developmental assessments that Health Visitors undertake with parents and carers of children aged 0 - 2.5 years old.

If you have a smartphone, tablet or computer, you'll be able to complete your child's development assessments online rather than using paper forms.

This will make it easier for you to:

- complete the forms online - you'll no longer need to worry about losing or forgetting the paper forms
- find guidance and support for your child's development with videos and other content
- access your child's development records whenever you may need them.

## Next steps

Once your contact details (email and mobile telephone number) have been confirmed by your Health Visitor, you'll receive a notification asking you to create your account.

As part of setting up the account, you'll also be asked to create an NHS login for security purposes. You will also be able to use the NHS login to access health websites and apps wherever you see 'NHS login' including the GM Early Years App.

**For further information, visit** [earlyyearshelp.greatermanchester.org.uk/help-carers.html](http://earlyyearshelp.greatermanchester.org.uk/help-carers.html) to view help guides on how to create your account and to access the GM Early Year's app, or speak to your health visiting team.
